

IDEA AND FLOW IS :

1. Create a firebase and add authentication

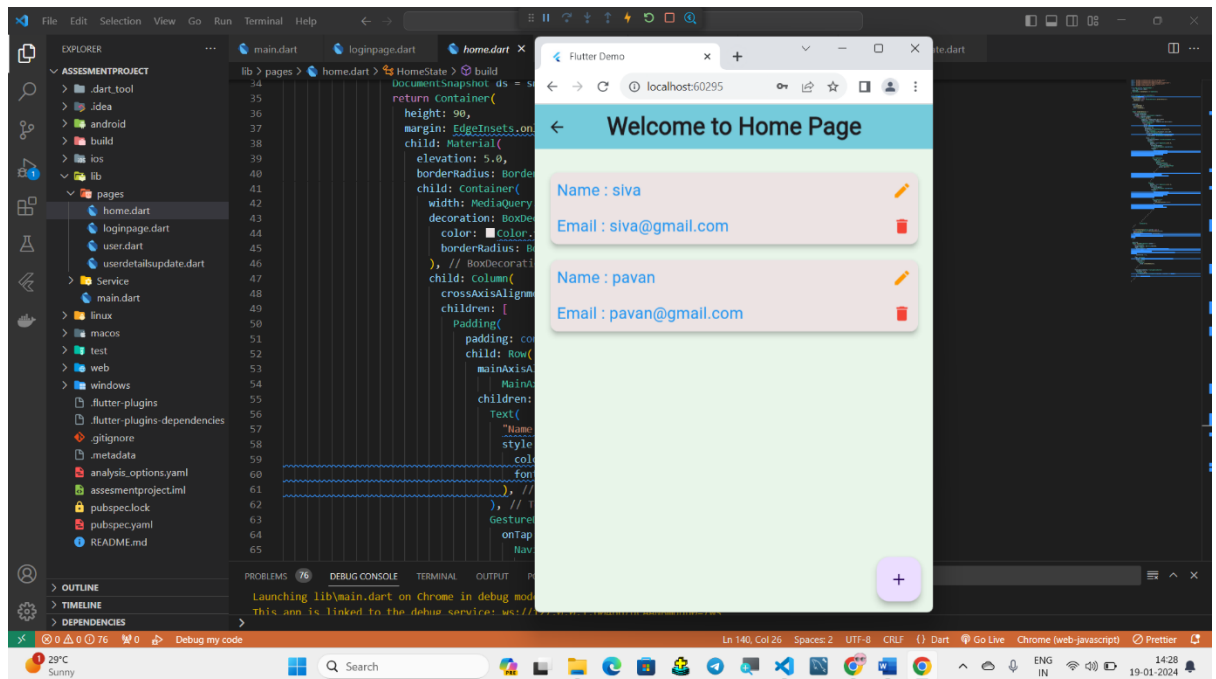

2. Create web app and initialise in main method to access firebase and add dependencies
3. Create loginpage

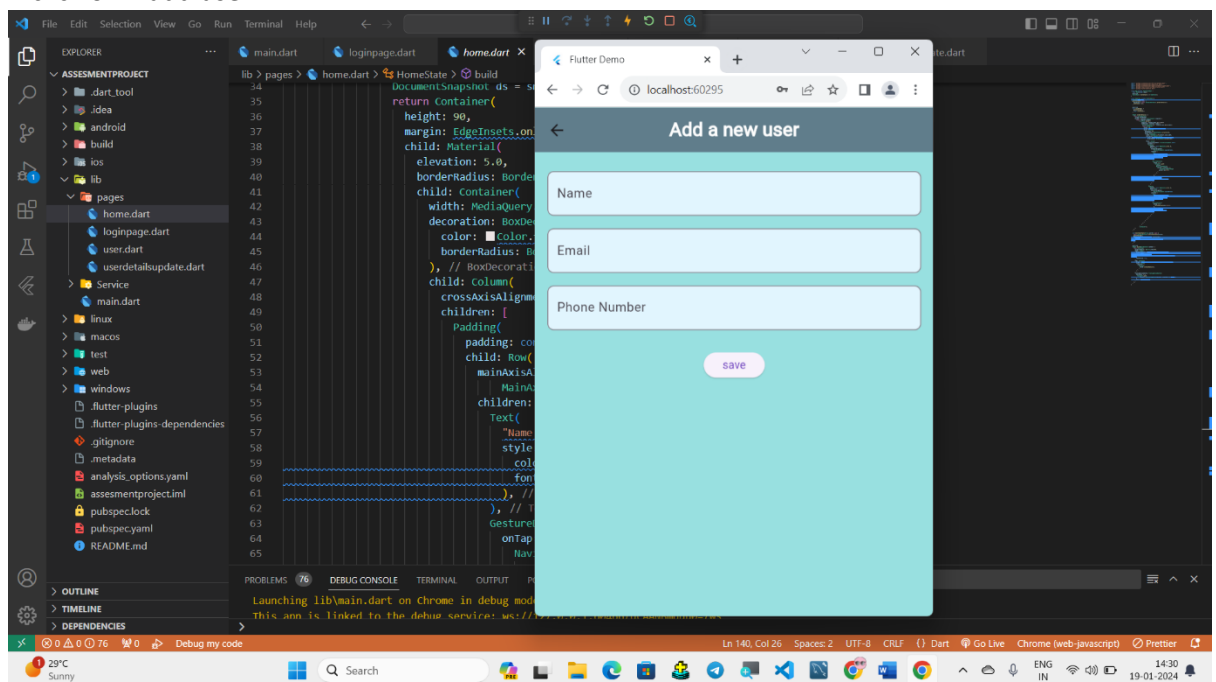

4. Give email nani@gmail.com and password: nani@123

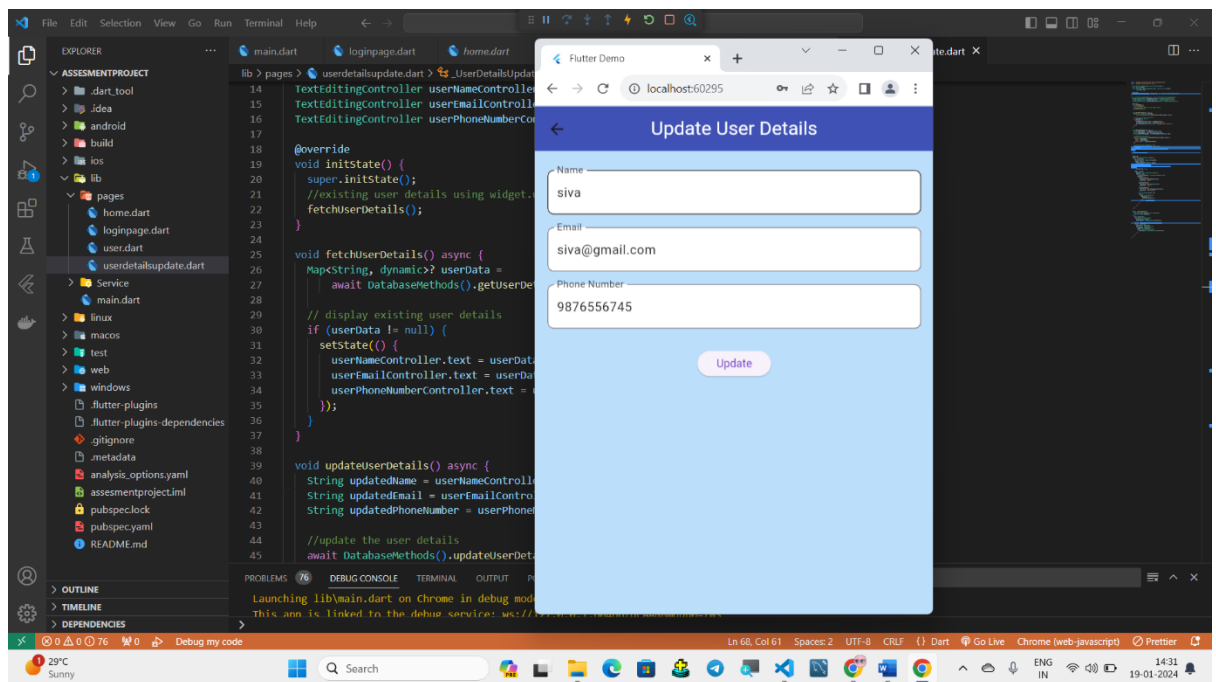

5. Than home page

6. If click on + add user

7. if i click on edit get edit page

8. Click on delete icon the data is deleted
